Built to last — designed to be lived in.

KITWOOD is a Lebanese atelier that has been making kitchens, wardrobes and architectural cabinetry for forty-five years.

We work the way a tailor works: with the room, with the client, with the material at hand. Drawings are revised on the bench. Joinery is dry-fit before delivery. Stone is cut in the same building it will be installed from.

The result is quiet: a kitchen that feels inevitable, a wardrobe that reads as architecture, a worktop measured to a tenth of a millimetre.

We do not chase trends. We answer briefs. And we measure the work by how well it ages.

ATELIER

DOIMO

Forty-five years, three generations.

1981

The first atelier

KITWOOD is founded in Beirut as a family woodworking shop. From the first day, every kitchen is dry-fit on the bench before it ships.

2008

Beirut flagship

The Sin El Fil showroom opens — the company's first dedicated retail space and the start of the in-house design studio.

2014

Stone & ceramic atelier

A dedicated stone and ceramic department is added to the atelier — bridge saw, waterjet and CNC profiling for engineered quartz, natural granite and large-format ceramic (MDi).

2019

Cyprus expansion

KITWOOD enters Cyprus with a representation in Larnaca, serving Mediterranean clients and architects with the same atelier behind it.

2025

Zouk Mosbeh factory

The atelier relocates to a new six-thousand-square-metre facility in Zouk Mosbeh — two parallel CNC cabinetry lines and the stone & ceramic fabshop under one roof.

Measured not by noise — by what has been built.

45

YEARS OF
MANUFACTURING

Lebanese family ownership, unbroken
since 1981.

2026.

04 — THE ATELIER

One roof. One discipline.

Six thousand square metres in Zouk Mosbeh — two cabinetry lines and a dedicated stone & ceramic fabshop, connected by a single quality-control corridor.

Engineering at the scale of a project.

The atelier is organised as three parallel halls under a single shop floor. A designer can revise a single dimension on Monday and see it routed, sprayed and dry-fit by the end of the week.

01

Cabinetry Line A — Nesting

Flatbed CNC nesting and drilling. Cabinet parts cut from full sheets to the millimetre, pre-drilled for European hardware and batched by room.

02

Cabinetry Line B — Edge & Assembly

Automatic edge-banding, case-clamp and dry-fit. Every cabinet is squared, banded and assembly-checked before it leaves the floor.

03

Stone & Ceramic Fabshop

Bridge saw, waterjet and CNC profiling for engineered quartz, natural granite and large-format ceramic (MDI). Worktops cut in-house.

FINISHING & QUALITY

Climate-controlled spray booths for PU lacquer and water-based systems — matt, satin and high-gloss in any RAL or NCS. Every panel measured before crating.

LOGISTICS

Banded, crated and labelled per room. Site installation by KITWOOD's own teams in Lebanon, partnered installers in Cyprus.

The kitchen. The room that makes the house.

Five collections, a single vocabulary. Each is a starting point — not a catalogue — and each is drawn to the room it will live in.

Cabinetry is engineered on-site at Zouk Mosbeh. Carcasses are E1 moisture-resistant; plywood is preferred for tall units and structural elements in our climate.

TEN · TWELVE · EIGHTEEN ·
TWENTY · TWENTYTWO

A single vocabulary, five resolutions.

TEN

Handleless

Concealed grip, flush front — the collection that defined our modern vocabulary.

TWELVE

Recessed Gola

A continuous horizontal channel; the door reads as a single plane.

EIGHTEEN

Slim integrated

Routed slim handle integrated into the door — quietly precise.

TWENTY

Architectural

Full-height monoliths, paired with bridges in stone, ceramic or metal.

TWENTYTWO

Material-led

Veneer, stone, fluted glass — composition over ornament.

Every collection is offered across the full vocabulary of finishes the atelier supports: PU lacquer, genuine wood veneer, HPL laminate, glass, ceramic, MDi and Fenix NTM®.

KLOZET®. A house within the house.

A dedicated wardrobe brand built to the same standard as our kitchens — walk-in, hinged, sliding — with European hardware, soft-close mechanisms and integrated LED lighting throughout.

Every KLOZET® system is drawn to the room it belongs to. No standard module, no compromise.

WALK-IN · HINGED · SLIDING

One vocabulary, three typologies.

WALK-IN

Dressing rooms

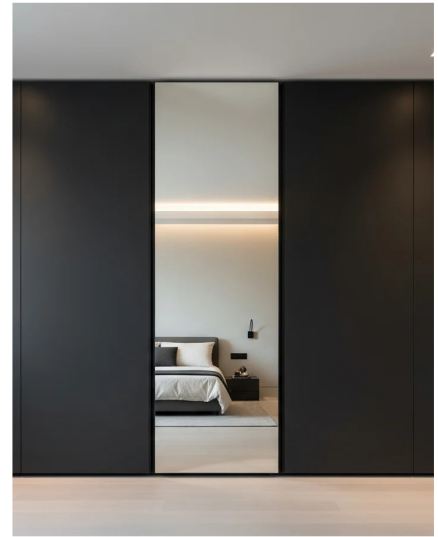

Warm wood interiors with a central island in stone — open hanging, integrated LED and full-height shelving drawn to the room.

HINGED

Framed glass

Floor-to-ceiling hinged doors in smoked-tint glass with slim metal framing and warm internal LED — visibility without the dust.

SLIDING

Matte lacquer

Full-height sliding panels in matte lacquer with a central mirror strip — silent rollers, recessed grip, no visible hardware.

INTERNALS

Island and pull-out systems, wardrobe accessories and soft-close hinges and runners — all selected from the premier Italian and Austrian fittings houses. Integrated LED and motion sensors on request.

ENGINEERING

Carcasses, doors and internals are finished to match the cabinetry of the adjoining bedroom or bathroom — the wardrobe reads as part of the architecture.

FEATURED PROJECT · BEIRUT RESIDENCE

A glass-topped island in a charcoal walk-in.

Charcoal matte-lacquer cabinetry, open hanging with integrated LED, a full-height shoe display and a central island finished with a glass top for jewellery and accessories. Drawn to the room and dry-fit before site delivery.

06 — ITALIAN PARTNERSHIP

Doimo Cucine. Exclusivity.

ASPEN · D12 · D20 · D23

KITWOOD is the exclusive dealer for Doimo Cucine. Italian industrial precision and CE-marked construction, complemented by the bespoke work of our atelier — and delivered by the same project manager and installation team.

08 — COUNTERTOPS & VANITIES

The surface.
The worktop.
The bathroom.

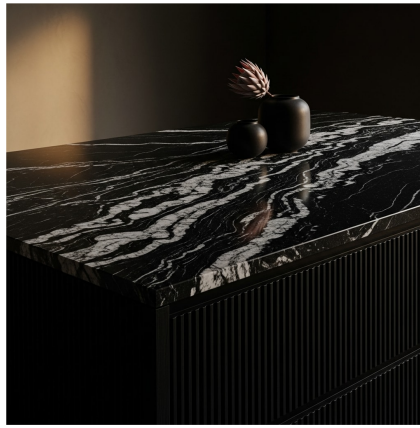

The same stone & ceramic fabshop that produces our kitchen worktops also cuts the vanity tops, splashbacks and architectural islands of every KITWOOD project.

QUARTZ

Engineered

Silestone® and equivalents. Non-porous, stain-resistant — our most-specified worktop.

GRANITE

Natural

Selected from our own stock yards. Honed, leathered or polished; edge profiles cut in-house.

CERAMIC / MDI

Large-format

Ultra-thin slabs. Heat, scratch and UV-resistant — ideal for outdoor kitchens and architectural islands.

BESPOKE VANITIES

Floating, integrated and double-basin vanities, drawn to the millimetre of each bathroom.

Carcasses are moisture-resistant. Tops are cut on the same stone line that produces our kitchen worktops — a single material thread runs through the project.

Certified, compliant, accountable.

-
- | | | |
|----|--------------------------|---|
| 01 | ISO MANAGEMENT | Audited annually since 2021. Order intake to delivery, documented and continually improved. |
| 02 | E1 PANELS | All carcasses in E1-grade moisture-resistant board. Plywood preferred for structural elements in our climate. |
| 03 | CARB-2 COMPLIANT | Phase-2 formaldehyde-emission standard — the most demanding indoor-air regulation in the industry. |
| 04 | CE-MARKED IMPORTS | All Italian-manufactured ranges and European hardware carry CE conformity marking. |
